

FCC - Please do not prohibit satellite radio companies from providing me local traffic and weather information. I spend 45 - 60 minutes commuting from downtown Dallas to my home in Corinth, and that is each way. I rely on traffic information and don't want to have to listen to ALL THE COMMERCIALS on the regular radio stations to get this traffic info. Please do not limit my choices as a consumer just to protect the interests of braodcasters. Thank you.
